

Granite Polishing Service

2016

ENVIRO CLEAN GROUT & STONE CARE INC.

Every now and again your granite will need to be re-polished and sealed!

Re-vitalize your granite with the
Enviro Clean Granite Tune-Up Polishing and Sealing Service

Granite Polishing & Sealing Service

Is your granite looking a little dull lately?

Granite countertops can add a sleek elegance to any kitchen, and because they're highly durable, they don't require much maintenance. However, over time, acidic substances can appear to etch the surface.

Overtime, everyday spills can dull your granite.

Everyday spills or residue from grease and dish soap can build up, causing the granite to look dull and faded.

If you notice granite near your stove or sink has begun to dull, it may be grease, oil, or soap residue. Rinsing the area with water and daily cleaners may not be enough to break down and remove the film.

Allow the professionals at **Enviro Clean Grout & Stone Care** to clean, polish and seal your granite.

Enviro Clean Grout and Stone Care is happy to announce the addition of a new service for our customers; the **Granite Tune-Up**.

Is there a build up of grease, oil, or residue on your granite counter?

Make your granite beautiful again!

The **Granite Tune-Up** is a granite maintenance service that includes a **3-step process which includes a deep clean, polish and seal for your granite countertops.**
